## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments, see page 7 to 13, filed June 22, 2006, with respect to claim 1-12, 14-18, and 20-21 have been fully considered and are persuasive. The claim rejection 35 USC 102 of February 24, 2006 has been withdrawn.

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

Claims 1-12, 14-18, and 20-21 are allowable over the reference of record because none of these references discloses or can be combined to yield the claimed invention. Maeda discloses an active shield (101, Fig. 1) situated in a substrate (1, Fig. 1), said active shield comprising a salicide layer (column 15, lines 14-15) situated on an active region, said active shield having a first conductivity type (column 3, lines 41-42); a passive component (SI, Fig. 8) situated in an interconnect metal layer in (CP, Fig. 8) said semiconductor die, said passive component being situated above said active shield (SI, Fig.8); however Maeda fails to teach such as an active shield situated in a silicon substrate, a salicided active region situated in the silicon substrate and situated adjacent to at least one side of and part from the active shield, where the active shield

has a first conductivity type and the salicided active region has a second conductivity type as recited in claim 1, 10, and 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
